

VISION FOR WOLFVILLE

Wolfville is a vibrant and versatile university town. It is a town rich in natural, built and cultural heritage. Its citizens, businesses, institutions and government value and protect our natural environment, economic vitality, social equity, life long learning, cultural diversity and heritage. Everyone accepts responsibility for making decisions that lead to a healthy, equitable and sustainable future.

Guided by principles of sustainability, we will work towards achieving the following objectives:

- An inclusive community based on social equity and guided by citizen engagement through ongoing public consultation;
- A community that fosters and supports affordable housing, a healthy business sector and a creative and adaptive economy;
- A community whose energy needs are reduced and largely met by renewable resources;
- *A community where of our food and material needs are produced locally, wherever possible;*
- A community in which the natural environment is respected and protected as our most valuable asset;
- A community where pollution is reduced and solid waste production is minimized and increasingly recycled;
- A community with active transportation networks where people do not have to depend on the automobile either for their mobility within the community or their links to the larger world.
