

### TIME PERIOD 2006-2015

#### OVERVIEW

Staff have reviewed the recommendations from fifteen plans, reports and strategies dating back to 2006 to provide an update on the accomplishments and establish a go forward plan. The following report cards provide a snap shot of each of the fifteen plans highlighting what has been Completed/Operationalized, Not Completed/Not To Be Done, Moved Forward and In-Progress.

**Completed** means that the recommendation has been accomplished.

**Operationalized** means that the recommendation has been worked into the everyday operations of the Town.

**Not Completed** means that although the recommendation has not be accomplished it is still relevant and will be completed.

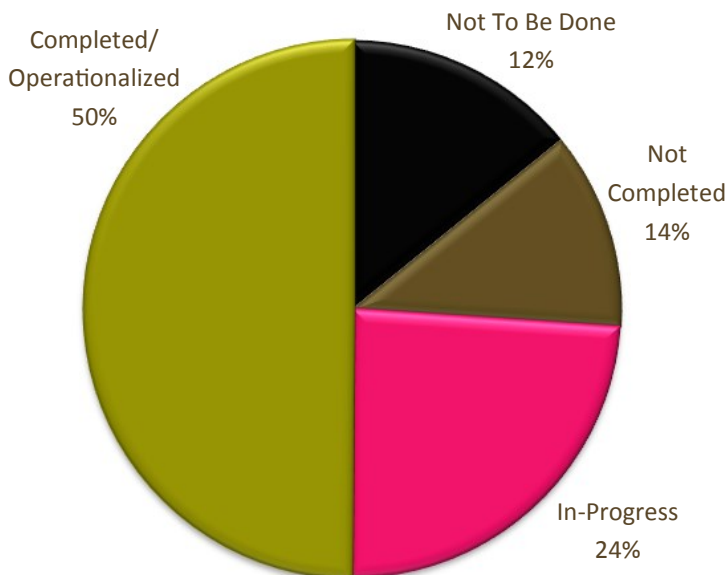

**Not to be Done** means that staff will not be completing the recommendation.

**Move Forward** means that the recommendation was important to consider as part of another plan and can now be found as a recommendation in that said plan.

**In-progress** means that staff are working on the recommendation.

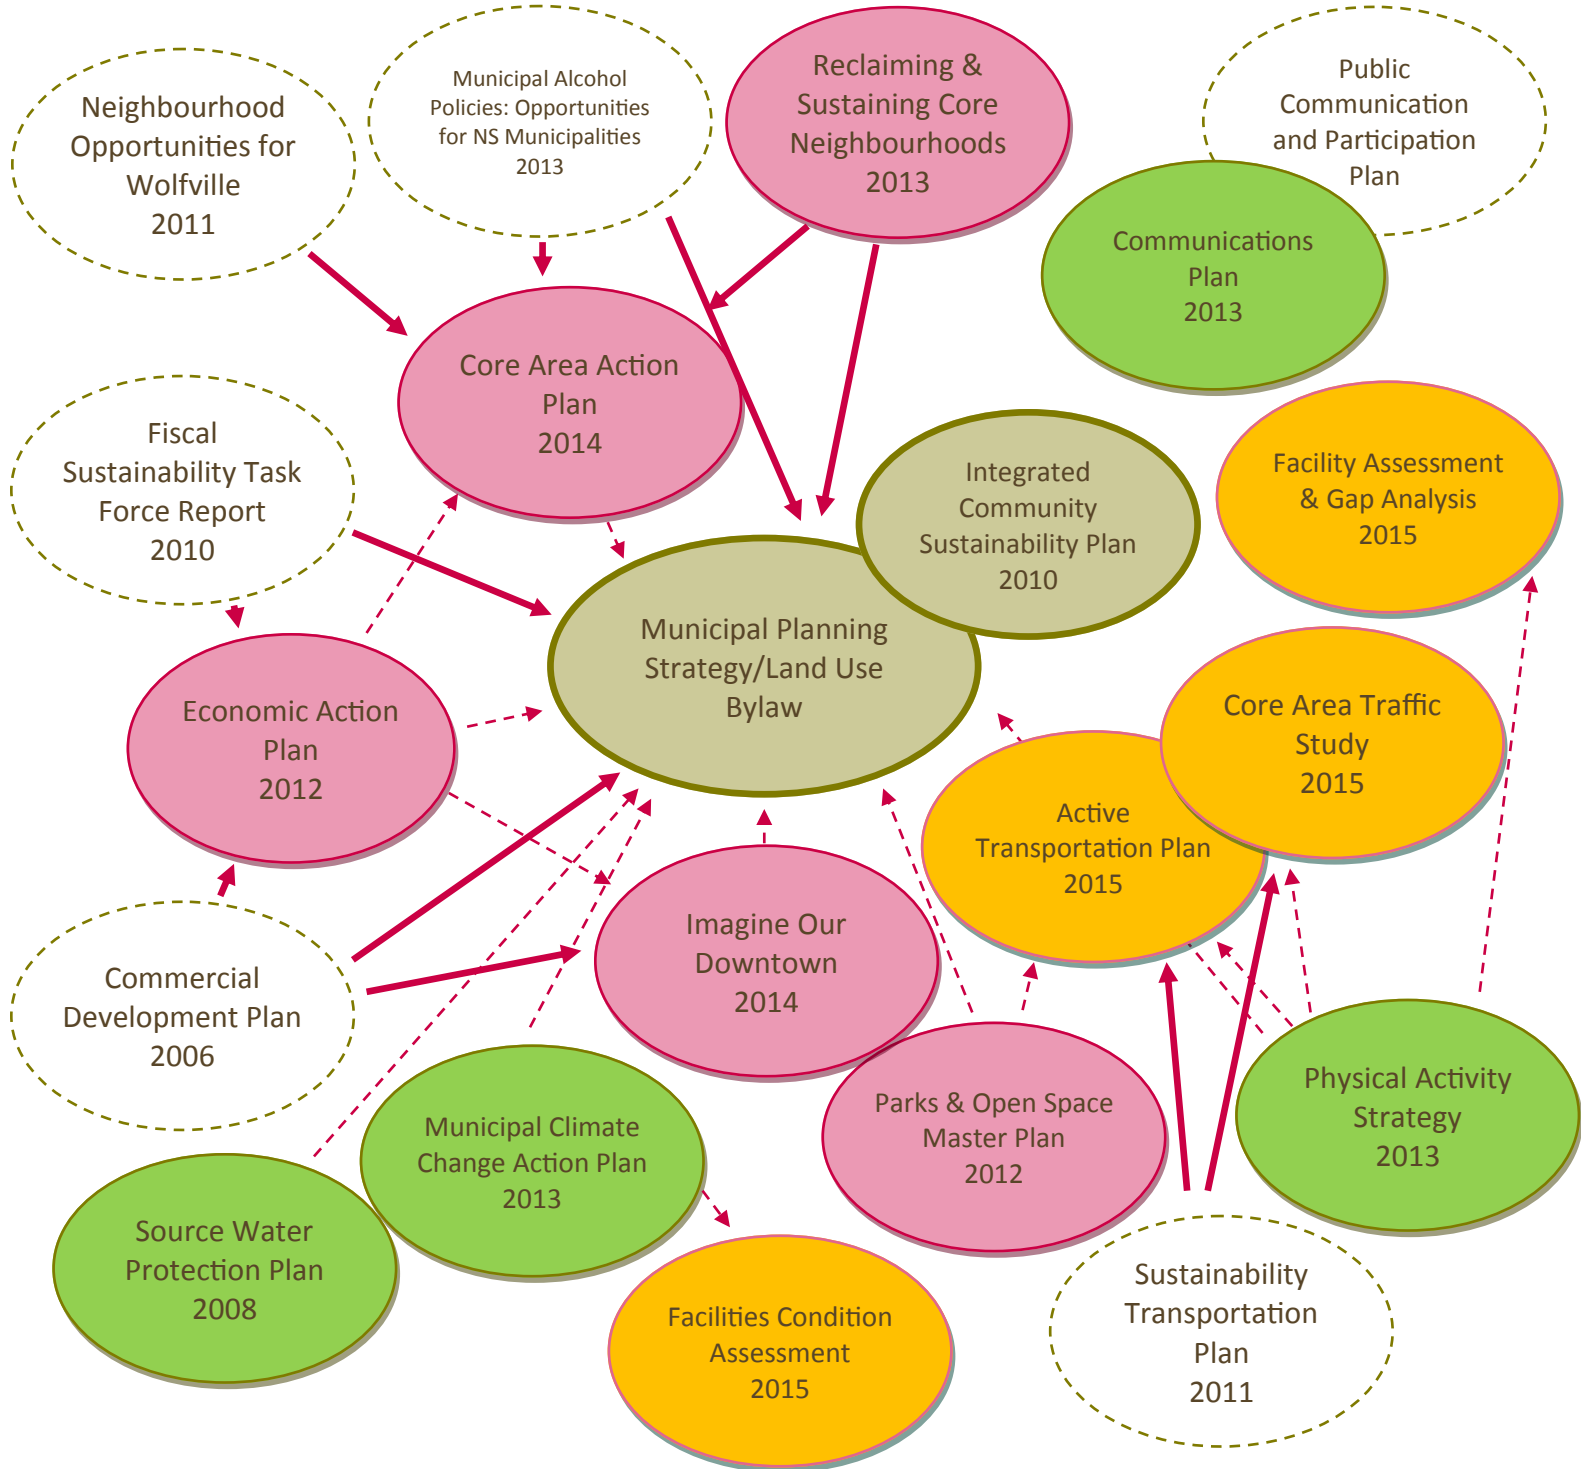

At the end of the report cards are two tables of recommendations, those that are Not Completed and those that are Not To Be Done. If there is a recommendation in the Not To Be Done table that Council unanimously agrees is a priority it will be considered under Not Completed. The Not Completed table has been prioritized by staff for consideration of Council 5 being highest priority and 1 being lowest.

#### OVERALL PROGRESS
